International Collaborations (other than with colleagues at current or previous employees)

- With Allard Tamminga (Utrecht University and University of Groningen, the Netherlands) and Hein Duijf (Free University of Amsterdam, the Netherlands): joint research on logics of collective and individual agency and obligation. The results of this research have been presented at various international workshops and conferences, and it has resulted in one joint conference paper (published in the LORI2017 proceedings), one journal article (accepted for publication), and another journal article (under review).

- With Hein Duijf (Free University of Amsterdam, the Netherlands): joint research on responsibility gaps and collective decisions. One paper in progress.
- With Dominik Klein (University of Bayreuth and University of Bamberg, Germany): joint research on the logic of collective attitudes (beliefs, abilities, obligations) and pointwise intersection in Neighborhood Semantics. This has led to a publication in the *Advances in Modal Logic* proceedings and two journal articles (one accepted for publication, the other under review).
- With Paul McNamara (University of New Hampshire, US): co-author of the Stanford Encyclopedia of Philosophy entry on *Deontic Logic*, and joint research on non-monotonic classical modal logics and neighbourhood semantics.
- External partner of the project *Logics of Information Flow in Social Networks*, led by Fenrong Liu at Tsinghua University.
- With Davide Grossi (University of Groningen), Zoé Christoff (University of Bayreuth), and Dominik Klein (University of Bayreuth): joint research on formal foundations of liquid democracy and the delegation of voting powers.
